DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-24 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 16-19, 22, 24 and 36-38 of copending Application No. 09/825,453. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference between the present claims and the copending claims is that the present claims claim that the visual images of different characteristics are of the same digital image and the images being cut from the single medium and placed on a page to be used in a scrapbook.

Regarding the image being the same, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide any image whether it be the same or a different image on the medium, since it would only depend on the intended use of the assembly and the desired information to be displayed. Further, it

has been held that when the claimed printed matter is not functionally related to the substrate it will not distinguish the invention from the prior art in terms of patentability. In re Gulack 217 USPQ 401, (CAFC 1983). The fact that the content of the printed matter placed on the substrate may render the device more convenient by providing an individual with a specific type of medium does not alter the functional relationship. Mere support by the substrate for the printed matter is not the kind of functional relationship necessary for patentability. Thus, there is no novel and unobvious functional relationship between the printed matter (e.g. digital images) and the substrate (e.g. medium) which is required for patentability.

Regarding the images being cut and placed on a page for scrapbooking, it is well-known to cut pictures from a sheet to be applied to a page for scrapbooking, school projects, etc. Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to provide the cut digital images on a page for scrapbooking purposes.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
